

We currently have an opening for a **Product Development Specialist**. The candidate will work independently within the Product Development division with little oversight and will be responsible for taking concepts to completion by creating great tasting and effective recipes that translate well to a mid-sized manufacturing environment. This position is located in the Fraser Valley.

Required Skills and Qualifications:

- University Degree in Food Science, Food Engineering, Chemical Engineering, or related subject.
- 3+ years of manufacturing experience, including new product development in the food industry.
- Minimum of 1+ year in research and development in a food manufacturing environment
- Production planning experience.
- Excellent time management and organizational skills; proven ability to manage multiple priorities within deadlines
- Business development experience and tact in dealing with external clients.
- Intermediate Word, Excel and PowerPoint
